

The Chair for Software and Systems Engineering at the **University of Konstanz** — Germany, has the opening of a **2-year** full-time

Research Assistant / Post-Doc

position available working together with Dr. Georgiana Caltais.

We are looking for candidates with expertise in designing and analysing complex systems.

Areas of particular interest include, but are not limited to:

- * software defined networks,
- * causality checking and formal models of causality,
- * automatic program repair,
- * formal languages / automata,
- * static program analysis,
- * programming according to engineering best practices.

Preference will be given to theoretically-minded candidates!

The salary is according to the payscale Entgeltgruppe 13 of the TV-L labor agreement (starting from appr. **€ 46.000 p.a.**), which can be found at:
<https://oeffentlicher-dienst.info/tv-l/allg/>

For more information I can be reached via e-mail at:
Georgiana.Caltais@uni-konstanz.de

I will be happy to answer further questions!
